- Public hearings start on time. For in-person meetings, arrive a few minutes early so you have time to pick up materials and find a seat.
- Citizens will have the opportunity to offer oral and written comments into the record. Staff from the Commission, the Department of Commerce (Department), and the Applicants will be available to answer questions about the Project and the review process.
- The same information will be presented at the in-person and the remote access hearings.
- Each hearing will last until everyone at the meeting has had an opportunity to speak.
- Comments received at the hearing and during the comment period will be used to inform the record and help the Commission with making its final decision.

If you are joining the meeting by WebEx and would like to ask a question or make a comment during the designated portion of the meeting, use the chat function to send a message to the meeting moderator. If you are joining the meeting by phone, press *3 on your phone. When it is your turn to speak, your line will be unmuted, and you will be able to ask questions and provide comments. Additional information and instructions are available at:
<https://mn.gov/puc/activities/meetings/webex/>.

If you have questions about participating in the meeting or need assistance during the meeting, please contact the Public Advisor at the Commission (contact information below).

To find out if a meeting is canceled due to bad weather or other reasons call 1-855-731-6208 or 651-201-2213 or visit mn.gov/puc.

Project Descriptions and Process Information

Certificate of Need. The Applicants cannot construct the Project until the Commission analyzes whether the Project is needed to ensure adequate, reliable, and efficient energy supply and issues a certificate of need. On August 15, 2023, the Applicants filed an application for a certificate of need with the Commission for the proposed 345 kV Brookings County to Lyon County and Helena to Hampton Second-Circuit Project.

According to the Applicants, the Project would reduce energy costs by relieving the current transmission congestion in the Project area and is expected to increase access to low-cost, carbon-free, renewable energy, provide economic benefits; strengthen the regional grid, support wind generation facilities in Minnesota, North Dakota, and South Dakota, and advance the State's energy policy.

The total length of the Project is 98.5 miles in two segments between the Brookings Substation in White, South Dakota, and the Lyon County Substation near Marshall, Minnesota, and the between the Helena Substation in Scott County, Minnesota, and the Hampton Substation near Hampton, Minnesota. The Project would entail reconfiguration and addition of one structure to the existing line at the Steep Bank Substation, and rerouting HVTL around the Chub Lake Substation, including the addition of two new structures. The Project also includes installation of eight new poles near the eastern end of the Project. The Project modifications would take place within existing rights-of-way.

Environmental Report. Before the Commission can decide on the certificate of need application, the Department of Commerce (Department) must prepare an environmental report (ER). The ER is a written document that describes the potential human and environmental impacts of the proposed Project, alternatives to the Project, and methods to mitigate anticipated adverse impacts. The Department will release the ER on March 22, 2024. The ER will be available in eDockets and on the Department's website:
<https://apps.commerce.state.mn.us/web/project/338>.

Minor Alteration. The Commission must approve a minor alteration to the original Brookings to Hampton HVTL route permit before the Project is constructed. In November 2023, the Applicants filed their application for a minor alteration to the route permit for the Brookings to Hampton HVTL. The Commission can approve the minor alteration only if the Commission determines that the Project does not result in significant human or environmental impacts. The Commission may approve the minor alteration but impose reasonable conditions on its approval. These conditions may include measures to limit the human and environmental impact of construction and operation of the Project.

Minnesota Statutes and Rules. The certificate of need is governed by Minnesota law, including Minnesota Statutes Section 216B.243, and Minnesota Rules Chapters 7829 and 7849, specifically Rules 7849.0010 to 7849.0400 and 7849.1000 to 7849.2100.

The minor alteration application is being reviewed by the Commission pursuant to Minnesota Rule 7850.4900. The Commission considers the factors cited in Minnesota Rules 7850.4100 to evaluate the significance of potential human and environmental impacts of the minor alteration.

The rules and statutes are available for review at:
<http://www.revisor.mn.gov>.

Public Comment Period

Public comments will be accepted through April 18, 2024 at 4:30 p.m. Please include both docket numbers in all communications. Comments received after the close of the comment period may or may not be considered by the Commission.

Topics for Public Comment:

- Is the proposed Project needed and in the public interest?
- Should the Commission grant a certificate of need and approve the minor alteration?
- What are the costs and benefits of the proposed Projects?
- What are the environmental and human impacts of the proposed Projects and how can these impacts be addressed and mitigated?
- If the certificate of need is granted for the Projects, what additional conditions or requirements should be included?
- If the minor alteration is approved, what additional conditions or requirements should be included?
- Are there other Project-related issues or concerns?

Important: Comments will be made available to the public via the Public Utilities Commission's website, except in limited circumstances consistent with the Minnesota Government Data Practices Act. The Commission does not edit or delete personal identifying information from submissions.

Next Steps

After the public hearings, Judge Moseng will review the record, including comments received at the public hearings and prepare a report for the Commission. The ALJ Report will include a summary of the proceedings.

Upon completion of the public hearing process, the Commission will review the ALJ Report and the information in the record, including written comments and comments received at the public hearings. The Commission will make a final decision on whether to issue a certificate of need and approve a minor alteration. The Commission's final decision on the certificate of need for this Project is expected in late May 2024.
